SUMMARY

This is a report of forest production in Nova Scotia for the Calendar year 1983, based on data collected by the Operations Branch of the Department of Lands and Forests. Compiling, editing, publishing and distribution were done by the Program Planning Branch.

The information was collected from producers, processors and buyers of primary forest products. Sawmill firms reported the quantities sawn during the calendar year 1983 regardless of whether the wood was purchased, custom-sawn or produced by the mill owners themselves. Roundwood production was obtained from buyers and producers of pulpwood, pit-props, veneer logs and poles and piling.

Production data is concerned only with wood of Nova Scotia origin.

Production is shown as accurately as possible by county of origin. Resawn volumes are left out of this report to eliminate duplication of data.

The total commercial production, at roundwood level, amounted to 2 192 316 m^3, solid wood equivalent, down 20% from 1982. Sawlog volume increased by 16% from 1982, amounting to 911 963 m^3 equivalent. Round products decreased by 34% to 1 280 353 m^3 equivalent.

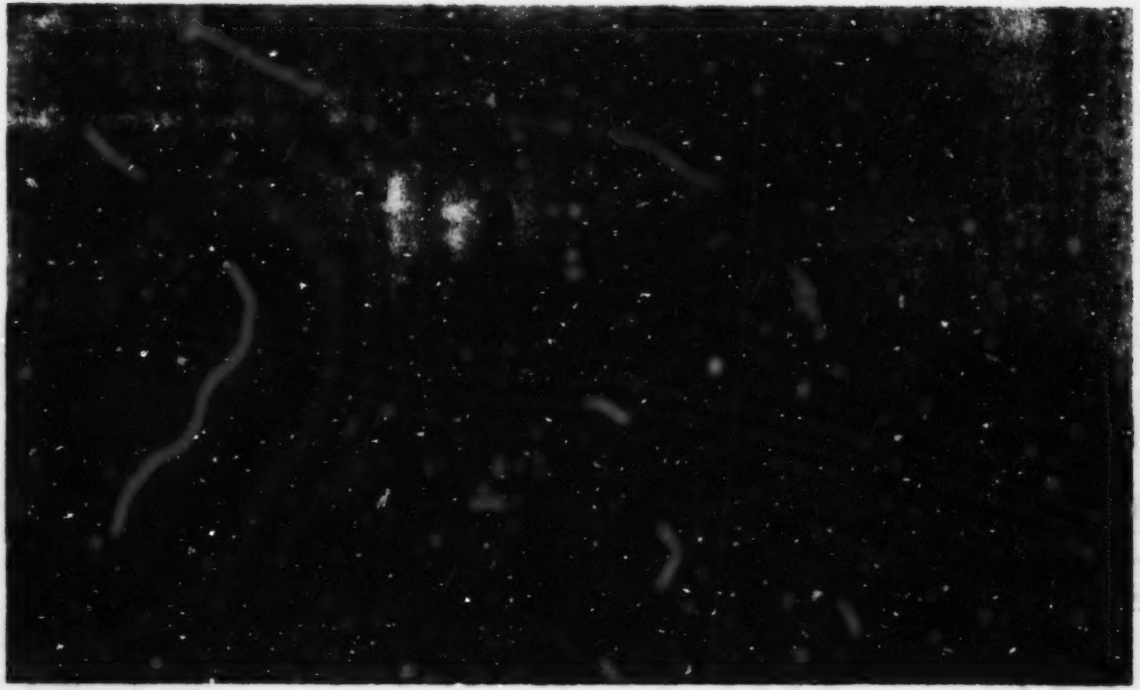
Production of pulp chips from sawmills decreased by 19% from 1982.

Compared to 1982, increases were reported for mine packs, staves and headings, pit props and softwood lumber. Decreases occurred in hardwood lumber, boxwood, railroad ties, laths, shingles, residue chips, poles and pilings and pulpwood. A renewed product for 1983 was whole tree chips.

The pulp and paper segment of the industry is comprised of five mills: a kraft pulpmill at Abercrombie Point; a sulphite pulpmill and newsprint mill at Point Tupper; a newsprint mill at Brooklyn; a paperboard mill at Hantsport and a hardboard plant at East River.

The total number of firms operating all types of sawmills increased from 376 in 1982 to 411 in 1983.

The number of firms producing over one million board feet during 1983 was 44, 9 more than in 1982. There were 313 firms producing less than one million board feet per firm compared to 290 in 1982.



LAUNCH PLEIADES, 1961

LAP

Of the smaller producers 224 produced 100 Mfbm or less in 1983.

Firms producing over one million board feet per firm accounted for 12% of the number of firms and produced 81% of the lumber and boxwood.

SUMMARY OF PRODUCERS BY TYPE OF SAWN PRODUCT

	1982	1983
Number of firms producing lumber only	272	295
Number of firms producing boxwood only	5	6
Number of firms producing tiles only	0	0
Number of firms producing mine packs only	1	1
Number of firms producing laths only	29	26
Number of firms producing shingles only	16	19
Number of firms producing staves & headings only	3	4
Sub Total	326	351
Number of firms producing more than 1 product	50	60
Total Number of Firms	376	411

See "List of Sawmill Owners and Materials Produced - 1983" for further information.

Production statistics by ownership class are included in this publication. Provincial Crown production was obtained from records kept by Department of Lands & Forests. Large Private owners provided data for private ownerships of over 1,000 acres per owner. Small private ownership production was estimated by subtraction of Crown and Large Private production from the total provided by sawmill and roundwood producers.
